Blu - Ray Master Submission Guidelines

Acceptable Storage Media

- USB 2.0 Hard Drive
- Blu - Ray Disc Recordable
- DLT TAPE (Acceptable but not suggested option)

Acceptable Image file Sets

- BD CMF V0.9
- BD CMF V1.01
- SONY CMF

General Information

- All masters are assumed to be authored, edited and sequenced exactly as the final product is expected to be.
 - If content of the master needs amending after check discs are produced, the original AACCS certificate will be invalid and needs to be applied for again.
- To avoid disputes and unnecessary cost, please double check the contents of the master before submitting master to MultipliCD
- Do not send MultipliCD your only copy of the master. Please ensure that you have a back up master before releasing any masters to MultipliCD

AACS (Advance Access Content System)

- AACS is the copy-protection system for High Def products and is mandatory within the specification of BD
- In order to be able to run BD titles through AACS, the content provider must sign the AACS license contract available for download (<http://www.aacsla.com/home>) and clear the registration fee
- Please provide CONTENT PROVIDER ID or CONTENT PARTICIPANT ID of AACS when submitting the master.
- The premastering process is 12-14 days for AACS and Stamper creation. This process may be expedited to 7-9 days for additional fees to AACS
